

CLIMMAR CONGRESS 2024

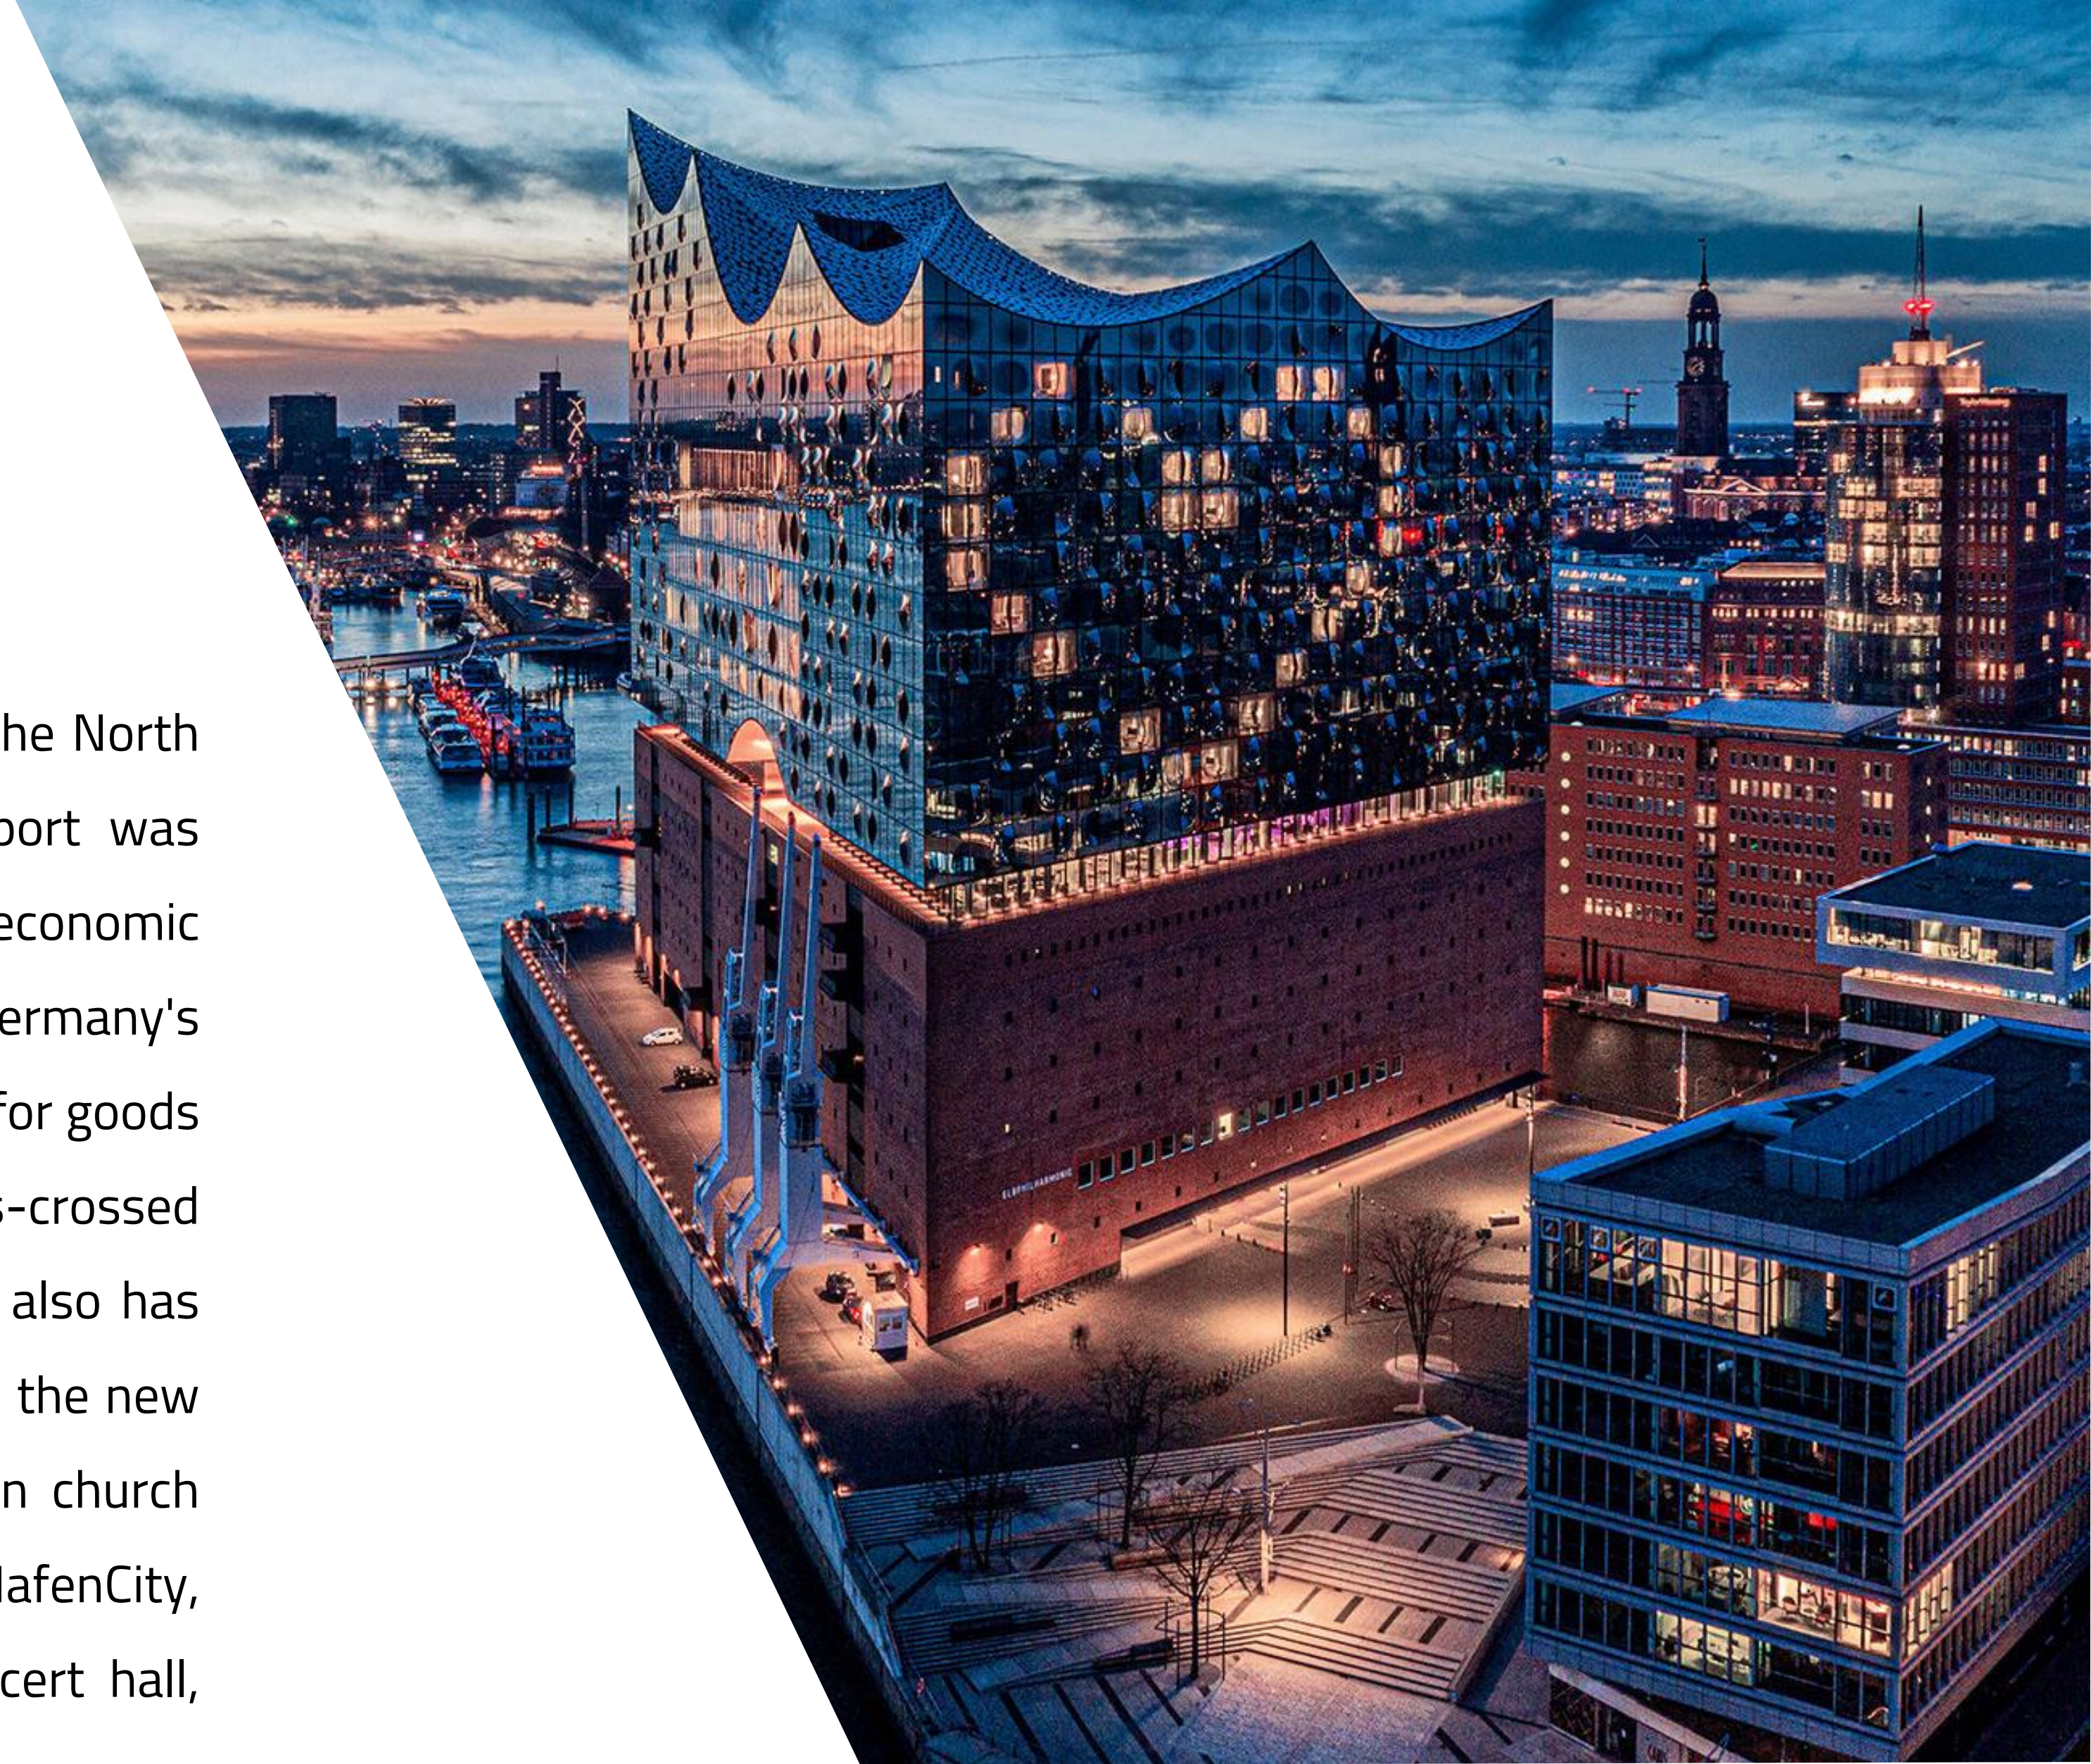

23. – 26.10.2024 | Hamburg | Agenda and organizational matters

CLIMMAR CONGRESS 2024

Welcome to Hamburg!

Hamburg is the major North German port city, connected to the North Sea by the Elbe. More than a thousand years after the port was founded, Hamburg is now the most important trading and economic center in Northern Europe. The Port of Hamburg is not only Germany's largest universal port, but also an important distribution point for goods trade between the North and Baltic Seas. The city itself is criss-crossed by hundreds of canals, some of which are called Fleete, and also has extensive parks and green spaces. The Jungfernstieg connects the new town with the old town, where landmarks such as the main church Sankt Michaelis are located. The largest construction project, HafenCity, is home to Hamburg's landmark - the Elbphilharmonie concert hall, which opened in 2017.
